Ricardo Teixeira

Gameplay Programmer

ricardo.f.teixeira2001@gmail.com

Technical Skills

Languages: C#, SQL, C++

Software Experience: Visual Studio, Unity (2015 - Currently), Unreal Engine 5 (2020 - Currently), JetBrains Rider, Perforce, Figma

Misc: Photoshop, Office Apps, Trello, Confluence, Jira

Work Experience

Saber Interactive Porto (Active)

Project: RoadKings (PS5, XBOX X/S, PC)

Date: February 2022 - Currently,

Role: Gameplay, Tools and UI Programmer (with more focus in Gameplay)

Misc: Bug Fixing, Implementation of Gameplay mechanics and managers, code Improvements, profiling, widget bindings, widget logic, menu navigation, editor tools (gameplay focused), generating files and managing assets with editor tools, consoles “Play Go” features.

Modal Creativity

Date: October 2020 - June 2021

Roles: Lead programmer in the Interactive Mirror project.

Misc: The project used Azure Kinect to detect the body movement and used an asset in the unity store to help getting the skeleton. The app can dress people as "Matrafonas" (people with exaggerated women clothes), take photos, randomize the clothing and has an easter egg where you can change the century so you would be dressed with clothes from the last century.

Lionbridge Community

Date: September 2020 - June 2021

Roles: QA. Test different games under NDA agreement

Education

High School: Informatics and Multimedia Technologies, Colégio de Gaia, Graduated in 2019

University: Bachelor's Degree in Development of Digital Games, IPMAIA, Graduated in 2022

Master's: Master's Degree in Development of Digital Games, IPCA, Graduating in 2026

Miscellaneous

Favorite Games: Rocket League, Valorant, Infamous franchise, GTA vice city stories, Factorio, Just Cause franchise, PUBG, Half life: Alyx

Interested Areas: VR development, PC/Console development
